

## Vintage Style “Ear-Ring”

Re-fashion mismatched jewelry into something new.

You can easily create this dazzling glamour ring using old, unused or mismatched jewelry from your jewelry box. Select a few things that you like just a bit too much to throw away.

You too can create this cocktail ring from a vintage Swarovski® crystal clip-on earring (pictured right) by following the easy instructions below.

### Technique:

- Wire Cutting
- Gluing

### Tools:

- Wire Cutters
- Goggles

### Materials:

- 1 clip-on earring
- 1 ring shank
- E6000 glue

### Instructions:

To create the ring pictured above:

- Carefully bend back the clip-on component on the back of the earring that you are going to use.
- Cut off the clip on component from the back of the earring using wire cutters. Be sure to wear goggles when using wire cutters.
- Be sure to file down any burred edges, so that rough edges do not catch on clothing.
- Use E6000 glue to secure the decorative part of the earring to a ring shank.
- Wait at least 24 hours for the glue to dry and voila! You now have a dazzling new piece of jewelry for your wardrobe!
