

macramé adjustable square knot closure

1. Bring all your base cords together so that they are parallel to each other. Place an 18-inch knotting cord horizontally underneath the base cords.

2. Following the Macramé Knot: Square Knot Technique, create a series of four square knots or approximately  $\frac{1}{2}$  inch over the base cords. Make sure the knots are loose enough to slide over the base cords.

3. Knot each end of the knotting cord with an overhand knot and glue. Make sure to knot the ends of your base cords or finish with beads.
